### SCOOT Headline Award

# NATIONAL HEADLINE AWARD SUCCESS FOR

## FINGERSAFE

Fingersafe has won a coveted SCOOT Headline Award for business success and the trophies were presented at a glittering presentation ceremony in The River Room at Millbank Tower, London on April 28, 2014

More than a million companies from all over the UK were invited to submit entries telling their success stories, and these covered all aspects of commercial achievement such as expansion, increased profits, export orders and new jobs created.

Trophies and certificates were presented by popular actress Ebony Feare, well known for appearances on television, the stage and in TV commercials. She recently made UK theatrical history by becoming the first black actress to play the title role of Alice in Wonderland, and she earned rave reviews for her performance in the London pantomime.

Ebony commented: "It is a

great honour to be asked to present these awards and help some of Britain's most enterprising companies to receive the recognition that their efforts deserve.

Star turn: Ebony Feare

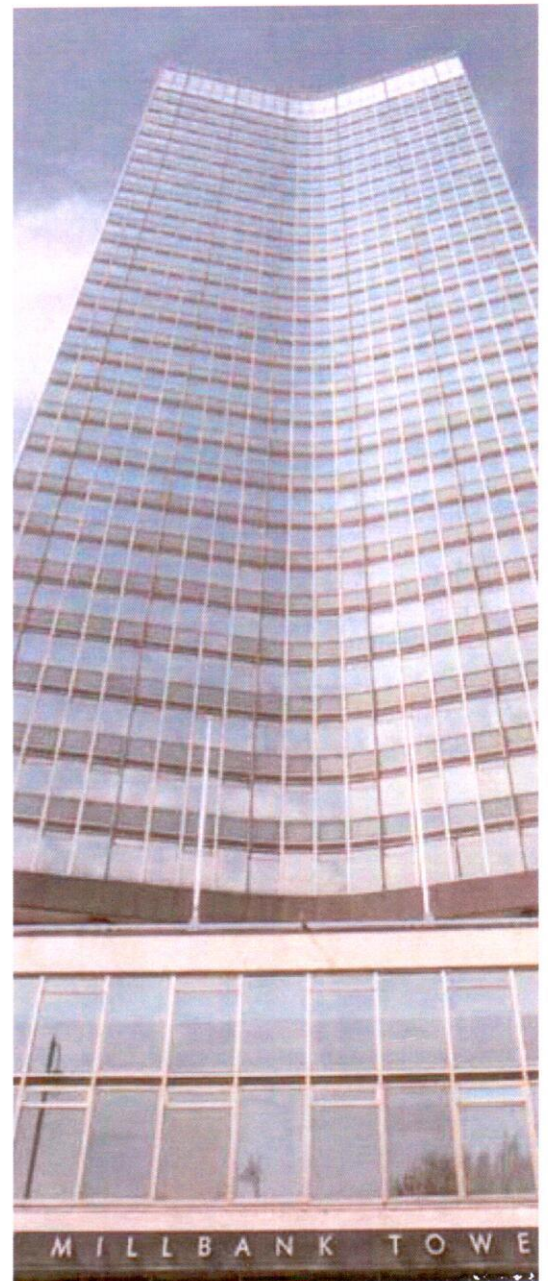

"I have been very impressed by the standard of entries and I am confident that they will go on to even greater success after their achievement here." Many of the winners will do exactly that by taking their achievement to the next level as National Business Leaders. This honour is accorded only to those

successful businesses who help other companies to emulate their commercial achievements.

Their SCOOT Headline Award-winning papers will be published in the 2014 National Business Leaders Yearbook, and this will be distributed free nationwide to thousands of businesses and entrepreneurs anxious to learn the secrets of business success.

Speaking for the sponsors, SCOOT UK Territory Director Dan Lawson said: "Our business directories help companies all over Britain to operate more effectively, and we are delighted to demonstrate our support for them, their staff, their products and their services.

"We have always realised that these businesses are the very lifeblood of British prosperity, and this is a unique and welcome opportunity to help them even more by bringing their remarkable achievements to the attention of a much wider audience."
